

Side view of the Volvo C303 hold, middle line (engine)

scale 1:10 cm

For your own engineering you only need to print the second page. Additional hints see here:

The dimensions of the free space are taken at the inner side from every part or frame or inner lining. The frame members on each wall or the roof are not included.

This view runs along the middle line, some of the elements in front or behind are drawn with dotted lines.

Consider inaccurate measurement of about half a cm...

Attention: Page is DIN-A4. Don't scale while printing.
